PROFILE

I am an active Informatics Engineering student with a strong interest in Machine Learning and Data Engineering. I have completed various academic projects involving data analysis, predictive modeling using Python (Scikit-learn, Pandas), and data exploration with SQL. I have also actively participated in self-paced courses and trainings on machine learning, big data, and data pipelines. My perseverance in learning data backend technologies and the application of machine learning algorithms prompted me to seek internship opportunities to broaden my practical experience and contribute to data-driven solutions in the industry.
